DERMAFLEX 906 LIQ

DERMAFLEX 906 LIQ is a synthetic blocks polymer based on a polyamide of a carboxylic acid.

TYPICAL ANALYSIS

Appearance Orange-yellow dispersion

 $\begin{array}{ll} \text{Solids} & 30 \pm 3 \text{ \%} \\ \text{pH (solution 10 \%)} & 6.0 \pm 1.0 \\ \text{Lightfastness} & \text{Very good} \end{array}$

PROPERTIES

DERMAFLEX 906 LIQ imparts to leather fullness and softness, acting alternatively or complementarily to traditional fatliquoring systems. It is fixed tightly to fibers, is resistant to oxidation and does not cause whitening. The resulting leather has particularly full, soft and silky hand.

APPLICATION

It is used during or after neutralization, on both chrome and vegetable tanned leathers, in amounts ranging between 6 and 7 %.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.

Our technical service is at your disposal for any recommendation.
