

MICRO-SOFT 010

Chemical nature	Water dispersion of silicone
Appearance	Clear liquid
Solids content	18.0 ± 2.0 %
pH	5.5 ± 1.0
Ionicity	Cationic

Applicazioni

MICRO-SOFT 010 è una nano-emulsione siliconica che per la sua eccezionale stabilità e le buone caratteristiche antistatiche può essere utilizzata nelle applicazioni a rullo dei fissativi poliuretanic, non influenzando assolutamente la migrazione del colore.

Main applications

MICRO-SOFT 010 is a nano-emulsion of silicone which can be advantageously used for roller application of polyurethane top coats for its outstanding mechanical stability and its good anti-static features, without affecting the colour migration.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
