

MICRO-SOFT 150/K

Chemical nature	Water emulsion of silicone
Appearance	Milky liquid
Solids content	10 ± 1 %
pH	3,0 – 5,0
Ionicity	Cationic

Applicazioni

MICRO-SOFT 150/K è un modificatore di tatto silicico che può essere aggiunto in proporzioni variabili.
Grazie alle sue caratteristiche auto-reticolanti, non riduce il potere fissante delle nitroemulsioni alle quali è aggiunto.
Può inoltre essere usato con ottimi risultati sia di mano che di copertura nei fondi resinati cationici.

Main applications

MICRO-SOFT 150/K is a silicone-based touch modifier, very versatile.
Its self cross-linking features allow to obtain excellent results without affecting the sealing characteristics of nitro emulsions.
It can also be advantageously used in cationic bottom coat solutions, with excellent results in terms of touch and covering.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.
Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.
Expiry date refers to the product well closed in the original container, correctly stored.
Some particularly sensitive products, when open, should be used rapidly.
Stir well before using the product, close tightly the container to preserve the properties.
Our technical service is at your disposal for any recommendation.
