

# MICROCAB V2-SL

Chemical nature	Aceto-butyrate lacquer
Appearance	Transparent liquid
Solids content	20.0 ± 2.0 %

## Applicazioni

MICROCAB V2/SL è basata su esteri di cellulosa modificata che risultano stabili alla luce ed al calore.

Il suo film ha un tatto secco e gentile, molto adatto per i pellami dai colori e bianchi.

Grazie alla sua particolare composizione chimica, essa può essere post-trattata con ausiliari acquosi.

Essendo inerte nei confronti dei catalizzatori impiegati nei calzaturifici, i pellami trattati con essa possono essere sottoposti all'iniezione di PU o PVC.

## Main applications

MICROCAB V2/SL is a lacquer In organic solvent based on modified cellulosic esters which are stable to light and heat.

It gives a film with dry gentle touch, very suitable for light and white leathers.

Thanks to its chemical composition, it can be after-treated with aqueous auxiliaries.

Being inert toward catalysts used in shoe factory, it can be injected with PU or PVC.

**KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C**

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

**Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.**

**Stir well before using the product, close tightly the container to preserve the properties.**
