

MICROFIX 1507/OP

Chemical nature	Water dispersion of polyurethane
Appearance	Viscous whitish liquid
Solids content	16.0 ± 1.0 %
pH	7.5 ± 1.0
Ionicity	Anionic

Applicazioni

MICROFIX 1507/OP è una emulsione poliuretanicca ed additivi vari al fine di ottenere nelle mani finali per articoli nappa, arredo e pelletteria una mano particolarmente gommosa e siliconica.
Se ne consiglia l'utilizzo in combinazione con altri poliuretani al fine di migliorarne le resistenze ed il grado di lucido.

Main applications

MICROFIX 1507/OP is a water dispersion of polyurethanes and additives formulated to obtain a gummy and silicone-like touch on nappa and upholstery articles.
We suggest to use it in combination with other polyurethanes in order to improve mechanical resistance and glossy effect.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.
Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.
Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.
Stir well before using the product, close tightly the container to preserve the properties.
Our technical service is at your disposal for any recommendation.
