Applicazioni

MICROLEVER PF-10 è uno stucco appositamente studiato per poter recuperare pelli particolarmente difettate, destinate ad articoli rullabili o lissabili e nappa.

Può essere utilizzato a spatola, tampone o nelle applicazioni roller.

Main applications

MICROLEVER PF-10 is a sealing agent particularly studied for the upgrading of very defected leathers and skins, for articles to be polished and glazed and nappa.

It can be used by spatula, hand padding or roller coater.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
