

MICROPUR 1009

Chemical nature	Water dispersion of polyurethane
Appearance	Liquid
Solids content	17.0 ± 2.0 %
pH	8.0 ± 1.0
Ionicity	Anionic

Applicazioni

MICROPUR 1009 è una dispersione di un poliuretano alifatico a base polietere, che presenta eccellente adesione su vari substrati. Forma un film morbido, trasparente leggermente appiccicoso. Esplica inoltre ottime caratteristiche di resistenze generali quali flessometrie a secco e umido.

Main applications

MICROPUR 1009 is water dispersion of aliphatic, polyether based, polyurethane, with excellent adhesion on several substrates. It forms a soft, transparent, slightly sticky film. It has very good resistance properties to flex, wet and dry.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
