

MICROPUR 1011

Chemical nature	Water dispersion of polyurethane
Appearance	liquid
Solids content	14.0 ± 2.0 %
pH	7.0 ± 1.0
Ionicity	Anionic

Applicazioni

MICROPUR 1011 è una dispersione acquosa di poliuretano alifatico e forma films morbidi e sottili. Ha ottime caratteristiche di stuccatura e chiusura del fiore e può essere vantaggiosamente utilizzato nelle mani di fondo per pelli smerigliate e molto elastiche, conferendo buone resistenze agli sfregamenti a secco.

Main applications

MICROPUR 1011 is a water dispersion aliphatic polyurethane and it forms soft and thin films. It shows excellent grain sealing features and can be advantageously used in bottom solutions for buffed and very elastic leathers.

It also allows to obtain good dry rub fastness.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
