

MICROPUR K-2000

Chemical nature	Water dispersion of aliphatic polyurethane
Appearance	Liquid
Solids content	20 ± 2 %
pH	2.5 – 4,5
Ionicity	Cationic

Applicazioni

MICROPUR K 2000 è un poliuretano alifatico cationico in dispersione acquosa. Forma un film di elevata elasticità, appiccicoso.

È particolarmente indicato nei profondi su pelli che presentano diffusi bassi di fiore o eccessivo assorbimento o come base adesiva su pelli con difficoltà di ancoraggio.

Main applications

MICROPUR K 2000 is water dispersion of aliphatic, cationic polyurethane and it forms very elastic and sticky films.

It is particularly suitable for pre-bottom of leathers with big defects of blind grain or excessive absorption.

It is also suitable as primer binder for leather with insufficient adhesion.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
