Esso è raccomandato per ottenere un livello di lucido elevato nella satinatura, per articoli brillanti, per articoli all'anilina con effetti bicolore, ecc., senza usare altri leganti.

## Main applications

MICROTOP 15 is a top finishing product, which gives a very high gloss: due to the excellent balance of casein, natural and synthetic waxes, it can be used as a plate release, a glazing season, a polishing season and an extender of polyurethane and acrylic resin top coats. It is suggested to use MICROTOP 15 to obtain high gloss in plating either for semi-aniline traditional articles or for pull up, bright articles, aniline articles with two colours effect, and so on, without using any other binders.
