

MICROTOP 20

Chemical nature	Modified casein binder
Appearance	Viscous liquid
Solids content	8.0 ± 1.0 %
pH	8.0 ± 1.0
Ionicity	Anionic

Applicazioni

MICROTOP 20 è un legante caseinico modificato con cere e prodotti riempienti. Trova impiego nelle rifiniture lissate e nei fondi rullati per ottenere una migliore chiusura del fiore senza alterarne la naturalezza. Può anche essere utilizzato nei lucidi finali come componente parziale, per la sua scarsa flessibilità.

Main applications

MICROTOP 20 is a casein binder, modified with waxes and filling products. It can be used for all articles to be glazed and in bottoms to be polished, in order to improve grain sealing without affecting natural look. Due to its poor flexibility, it can be also used as partial binder for final top coat solutions.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere of responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
