

MICROTOP K-PYB

Chemical nature:	Water solution of casein
Appearance:	Turbid liquid
Total Solids:	5.0 ± 1.0 %
pH (10 % water solution):	2.5 ± 0.5
Charge:	cationic

Applicazioni

MICROTOP K PYB è una caseina cationica di media durezza particolarmente indicata come pre-fondo rullabile e per articoli lissati per l'ottimo potere di chiusura dei bassi di fiore.
Può inoltre essere usato in miscela con resine e poliuretani cationici per modificarne l'appiccicosità e il tatto.
Le eventuali differenze di viscosità non pregiudicano la qualità né il risultato applicativo.

Main applications

MICROTOP K PYB is a cationic, medium-hard casein, very suitable as polishable pre-bottom and for articles to be glazed, due to its high grain-sealing features.
It can also be used together with polyurethanes and resins, in order to tune touch and stickyness of films.
The possible difference in viscosity of batches does not affect its application features.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.
Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.
Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.
Stir well before using the product, close tightly the container to preserve the properties.
Our technical service is at your disposal for any recommendation.
