

# MICROWAX 50-F

Chemical nature	Water emulsion of wax
Appearance	Liquid
Solids content	$7.0 \pm 1.0 \%$
pH	$9.0 \pm 1.0$
Ionicity	Anionic

## Applicazioni

MICROWAX 50-F è un'emulsione di cere sintetiche con tatto leggermente grasso. Ha un ottimo potere stuccante perciò è particolarmente apprezzato in tutte le rifiniture resinate alla pressa. Esplica inoltre una buona chiusura dei bassi di fiore su pelli che debbano lasciare il fiore molto naturale.

## Main applications

MICROWAX 50-F is a water emulsion of synthetic waxes with slightly greasy touch. It has excellent grain sealing features which make it very suitable for all resin-finished leathers. It also has good evening effect on blind grain for all natural-looking articles.

**KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C**

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

**Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.**

**Stir well before using the product, close tightly the container to preserve the properties.**
