

MICROWAX 832

Chemical nature	Water emulsion of wax
Appearance	Liquid
Solids content	25.0 ± 1.0 %
pH	3.5 ± 1.0
Ionicity	Anionic

Applicazioni

MICROWAX 832 è un'emulsione di cere naturali con punto di fusione attorno agli 80 °C, particolarmente utilizzata per effetti "Burnish" su pelli smerigliate con riconcia vegetale.

Su pelli nappa bottalate si possono ottenere effetti anticati molto naturali.

Main applications

MICROWAX 832 is a water emulsion of natural wax with melting point of approx. 80° C, particularly suitable for burnish effects on buffed grain vegetable re-tanned leathers.

It also allows to obtain very natural aged-effect on dry-milled nappa leathers.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
