

MICROWAX KK

Chemical nature	Water emulsion of modified amides
Appearance	White liquid
Solids content	8.0 ± 1.0 %
pH	4.0 ± 1.0
Ionicity	Cationic

Applicazioni

MICROWAX KK è un modificatore di tatto ceroso leggermente grasso. Il suo impiego nelle miscele cationiche di copertura è indicato per aumentarne la chiusura.

Può essere utilizzato sia su pelli naturali che rifinite, da solo o in combinazione con gli altri nostri modificatori.

È particolarmente apprezzato su pelli nappa abbigliamento.

Main applications

MICROWAX KK is a feel modifier with waxy and slightly greasy touch. It can be used to improve the sealing feature of cationic solutions.

It can be used either on natural or very coated leather, alone or in combination with other modifiers.

It is particularly suitable for garment nappa articles.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.

Our technical service is at your disposal for any recommendation.
