

MICROWAX PULL 424

Chemical nature	Water emulsion of natural oils
Appearance	Creamy liquid
Solids content	5.0 ± 3.0 %
pH	8.0 ± 1.0
Ionicity	Slightly cationic

Applicazioni

MICROWAX PULL 424 è un'emulsione di oli leggermente cationica che può essere usata nei pre-fondi cationici per diminuire gli assorbimenti e i bassi di fiore e nelle coperture di pelli morbide per conferire riempimento e morbidezza.

Con particolare attenzione, può essere facilmente miscelato con prodotti anionici: verificarne sempre la compatibilità.

Main applications

MICROWAX PULL 424 is a slightly cationic water emulsion of oils.

It can be used in cationic pre-bottoms in order to decrease absorption and blind grain defects and in covering solutions for soft leathers, in order to improve filling and softness.

It can be carefully mixed with anionic products, but we suggest to make small trials to check compatibility before industrial use.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
