

DERMACLEAN GA

Degreasing agent based on surfactants and polar solvents.

TYPICAL ANALYSIS

Appearance	Colourless to light yellow liquid
Active substance	73 ± 3 %
pH (10 % emulsion)	5.5-7.5
Ionic character	non-ionic
Electrolytes stability	Stable to electrolytes normally used in tannery

PROPERTIES

DERMACLEAN GA is particularly suitable to treat very fat skins, both pelt and pickled.

Moreover, it is suitable to treat chrome leathers, both wet blue and dry, so acting as a soaking agent and eliminating fat residues without further empty the leather.

APPLICATION

The amounts of use range from 0.5 to 4.0 % depending on the skins to be treated. Better results are obtained using a short float.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
