

DERMADOL OCS

DERMADOL OCS is a synthetic fatliquor with high stability and penetration

TYPICAL ANALYSIS

Appearance	faint yellow liquid
Active matter:	42 ± 3 %
pH (10 % emulsion)	6.0÷8.0
Stability to electrolytes	very good
Lightfastness	very good

PROPERTIES

DERMADOL OCS is a synthetic fatliquor with excellent emulsion stability, particularly studied to be used in pickling and/or chrome tanning. It deeply penetrates through the structure of raw and treated skin and helps the dispersion and distribution of fats, both natural and of process. This product is particularly suitable for the production of suede, bovine and ovine.

By using DERMADOL OCS, the surface deposits of oils are reduced, so helping a good buffing while ensuring a level, fast soaking.

APPLICATION

Pickling and chrome tanning: up to 2.0 %, on pelt weight.

Re-chroming and neutralization: up to 3.0 %, based on shaved weight.

Suede: up to 6.0 %, based on shaved weight.

Shearling: up to 10 grams per liter. based on shaved weight

When correctly stored, it is stable 12 months.
