

DERMADOL W 100

DERMADOL W 100 is a waterproofing fatliquor.

TYPICAL ANALYSIS

Appearance	white paste
Active matter	44 ± 3 %
Chemical composition	emulsified synthetic oils
pH (10 % solution)	6.5÷8.5
Lightfastness	Excellent

PROPERTIES

DERMADOL W 100 is a waterproofing synthetic fatliquor with very high softening properties. It can be used as the main fatliquor for garment and upholstery leathers, and is also suitable for the production of washable leathers. DERMADOL W 100 can be treated with polyvalent metal salts for the production of water repellent leathers. It can be used with other fatliquors and when used in sufficient quantities, it will increase the water resistance of the leather. Normal acid fixation suffices.

DERMADOL W 100 can be used for the fatliquoring of vegetable tanned leathers. Good resistance to the effects of water drops is achieved.

APPLICATION

DERMADOL W 100 can be used in 2.0÷4.0 % amount for general applications, also in combination with other fatliquors.

For full waterproofing properties, DERMADOL W 100 applied alone or in combination with other waterproofing fatliquors, needs a fixation with polyvalent metal salts. Double washes after neutralization and chrome fixation are recommended to achieve full waterproofing.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
