

DERMASOFT FF LIQ

Auxiliary product for leather retanning.

TYPICAL ANALYSIS

Appearance	colourless or light coloured liquid
pH solution 10 %	6.5-8.5

PROPERTIES

DERMASOFT FF LIQ is particularly suitable as retanning auxiliary when syntans are used. Its property is to sequestrate the free formaldehyde which can be present, contributing to considerably lower its levels in the resulting leathers: the final values should be acceptable or completely absent.

APPLICATION

Amounts to be used changes according to the application. Generally from 1 to 2 % in final wash are used.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
