

# DERMASOFT SI85

Reducing agent to eliminate dyeings on leather.

## TYPICAL ANALYSIS

Appearance	White powder
Active content	> 95 %
pH (solution 10 %)	8.0 ± 1.0

## PROPERTIES

DERMASOFT SI85 is used to take off dyeings from every kind of leather, so it is possible the recovery of damaged or unsuitable dyeings. The skins are not damaged and the grain is fine and firm.

## APPLICATION

The amounts change from 1 to 8 %, depending on the colour to be removed: best to operate at 30-35 °C for 1h, at pH around 7-8.

Please note that black colour is not completely removed, so the hides will result grey.

This product doesn't work on sulphur dyes, as they require an oxydising treatment.

***It is recommended do not to work in acidic medium:*** in such conditions, sulphur dioxide is evolved, a very irritating chemical.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.
