

DERMASOFT ST

DERMASOFT ST is a medium chain phosphate derivative.

TYPICAL ANALYSIS

Appearance	White powder
pH (1% water solution)	8.5±1.0
Active substance	> 92 %
Water solubility	Soluble

PROPERTIES

DERMASOFT ST improves lime solubility and has a chelating action toward iron ions.

Due to its chemical characteristics the application of DERMASOFT ST during liming and deliming enables the efficiency of the entire system avoiding troubles of lime penetration and preventing lime blast.

This product is also an auxiliary to improve the penetration of products used in the tanning industry such as dyestuffs.

APPLICATION

The amounts depend on the specific application and range:

- Liming	0.2 ÷ 1.0 %
- Deliming	0.5 ÷ 1.0 %
- Masking/neutralising	0.5 ÷ 2.0 %
- Dyeing/retanning	0.5 ÷ 2.0 %

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
