

DERMASOFT W LIQ

DERMASOFT W LIQ is an auxiliary syntan in liquid form, based on naphthalenesulphonic acid.

TYPICAL ANALYSIS

| | |
|--------------------|---------------------|
| Appearance | Limpid brown liquid |
| Solid content | 40 ± 3 % |
| pH (10 % solution) | 7.0±1.0 |

PROPERTIES

DERMASOFT W LIQ is suitable for all kinds of leather. Its application decreases the affinity of anionic dyestuffs for chrome tanned leather, resulting in a more rapid penetration with a better distribution of dyes.

This product can be added directly together with anionic dyestuffs.

Lightfastness is not high but enough for pastel shades production.

DERMASOFT W LIQ has a good dispersing action, particularly suitable when used with natural extracts and resins.

APPLICATION

Typically an amount of 2.0÷5.0 %, based on shaved weight, is enough.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
