

PATO POL/95

Soft retanning agent based on aldehydes derivatives.

TYPICAL ANALYSIS

Active substance	73 ± 3 %
Appearance	Yellow liquid
Salts stability	Very good
Veg extracts stability	Very good
Lightfastness	Good

PROPERTIES

PATO POL/95 may be used in pre-tanning for both vegetable and chrome tanned leathers, directly adding the product to the pickle float at pH less than 3.8.

PATO POL/95 used as retanning agent gives the leather a very good fullness and softness.

PATO POL/95 improves the penetration of anionic dyes without affecting brightness and level.

APPLICATION

From 5 to 10 % on shaved weight for most applications.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
