## PATO TW

PATO TW is a aldehyde based product.

## TYPICAL ANALYSIS

| Appearance                                     | Almost colourless liquid, with typical smell   |
|--|--|
| Chemical composition                           | Aqueous solution of a modified glutaraldehyde  |
| pH (10 % aqueous solution)<br>Water solubility | 5.5-7.5<br>The product is dilutable with water |

## PROPERTIES

PATO TW can be used in a wide variety of situations to improve the quality of leather. It increases the softness of the leather and improves its response to dyeing. It is usually compatible with anionic and cationic auxiliaries. Leathers tanned with PATO TW have high lightfastness and heat resistance. Unlike unmodified glutaraldehyde, it can be used to tan white leathers and leathers dyed to pale shades.

## APPLICATION

Generally 2-3 % on the shaved weight is the required amount. The product should be diluted with water (1:1 - 1:5) before use.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible. **Expiry date refers to the product well closed in the original container, in fresh and dry area.** Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties. Our technical service is at your disposal for any recommendation.

When correctly stored, it is stable 12 months.
