

## CERTIFICATION ZDHC level 3

Our company is registered on ZDHC Chemical Gateway portal (ZDHC ID A204HO73); in the past we uploaded several products at level 0 and 1.

Since the beginning, indeed, we are interested in using products as safe as possible, and participating at this project, we aim to meet the needs of our customers, committing ourselves to certify again the warranty of safety and quality of the chemicals supplied.

Recently we got certification level 3 according to TS 420 of ICEC (CERT-022-2023-ZDHC-ICEC).

The certificate of Dermacolor covers more than 300 products, wet phase and finishing as well.

We are now going on uploading the products on the *Chemical Gateway* portal: the certificate has already been uploaded; as soon as possible the products will be published.

*Moreover, it is our goal to insert progressively all the products of our range.*

The selection of the products to be certified in this first stage was made taking into account several considerations, among them requests of our customers and overall amounts.

We trust that you would appreciate our commitment to support your activity and remain at your disposal for further details and clarifications, through our technical and commercial support.
