

# MICROFIX 1070

Chemical nature	Water dispersion of aliphatic polyurethane
Appearance	Liquid
Solids content	15 ± 2 %
pH	6,5 – 8,5
Ionicity	Anionic

## Applicazioni

MICROFIX 1070 è una dispersione acquosa di poliuretano alifatico. Forma un film fine mediamente morbido lucido, il suo impiego è consigliato quale componente di profondi da rullare o lissare e in tutte quelle applicazioni dove si debbano migliorare le caratteristiche di solidità generali.

## Main applications

MICROFIX 1070 is a water dispersion of aliphatic polyurethane and it forms fine, medium-soft and glossy films. It is very suitable in pre-bottom solutions to be glazed or polished and in all application where enhancement of general resistance is required.

**KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C**

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications. Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

**Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly. Stir well before using the product, close tightly the container to preserve the properties.**
