

MICROFIX 1403

Chemical nature	Water dispersion of polyurethane
Appearance	Translucent liquid
Solids content	31.0 ± 2.0 %
pH	8.5 ± 1.0
Ionicity	Anionic

Applicazioni

MICROFIX 1403 è un poliuretano appositamente studiato per le applicazioni a rullo per ottenere effetti tipo vernice bicomponente in solvente. Ottime sono le sue resistenze alle flessioni, all'abrasione ed agli sfregamenti secco/umido. Può essere inoltre impiegato come finale su articoli schiarenti a base di cere ed oli applicati anche a caldo.

Main applications

MICROFIX 1403 is a water dispersion of polyurethane, particularly formulated for roller-coater application, to obtain patent leather-like effects.

It has excellent flex, dry and wet rubbing resistance and it can be advantageously used as top coat for burnish articles, where oils and waxes are applied.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
