

MICROFIX NUBUK

Chemical nature	Polymeric anionic dispersion
Appearance	Milky liquid
Solids content	13.0 ± 1.0 %
pH	10.5 ± 1.0
Ionicity	Anionic

Applicazioni

MICROFIX NUBUK è una dispersione polimerica anionica, applicabile su pelli nubuck o velour per migliorare la resistenza allo sfregamento. Esso può essere applicato su pelli nubuck o velour per ravvivare e intensificare i toni. Può essere colorato con aniline da rifinitura.

Main applications

MICROFIX NUBUK is a polymeric anionic dispersion which can be applied on nubuk and velours leather to improve rubbing performance. It may be used on nubuck or velour leathers to give deeper and bright shades. It can be dyed with finishing dyes.

KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C

This sheet is a synthetic illustration of the product to enable the user to employ it at the best. Properties and values are not, therefore, sales specifications.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility.

Expiry date refers to the product well closed in the original container, correctly stored. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
