

# MICROWAX 63

Chemical nature	Water emulsion of wax
Appearance	Milky liquid
Solids content	28.0 ± 2.0 %
pH	8.5 ± 1.0
Ionicity	Anionic

## Applicazioni

MICROWAX 63 si applica in miscele anioniche per ottenere ottime chiusure del fiore corretto, con effetto sbiancante. Presenta tatto talcato, ottimo per effetti *burnish*. Nei fondi si consiglia di non superare i 100 g/lt. È utilizzato su pelli smerigliate per calzatura ottenendo un effetto sbiancante che, una volta spazzolato, conferisce alla pelle un pronunciato effetto scurente.

La pelle trattata con MICROWAX 63 ha una mano morbida e talcata, presenta una chiusura uniforme ed estremamente naturale, ricreando un aspetto pieno fiore anche su pelli fortemente smerigliate.

## Main applications

MICROWAX 63 is applied in anionic mixtures in order to improve the leather sealing on correct grain. It give "talc" hand, excellent for burnish effect. It is recommended to not exceed 100 g/lt in bottom.

It is used on buffed leather for footwear to obtain a bleaching effect which, once brushed, gives the leather a pronounced darkening effect.

The leather treated with MICROWAX 63 has a soft and "talc" hand, and presents a uniform and closed aspect very natural, creating a full grain look also on heavily buffed skin.

**KEEP FROM FREEZING - CAN BE STORED FOR 6 MONTHS BETWEEN +5 AND +35°C**
