

BIOTASE CONC

Enzymatic bating agent.

TYPICAL ANALYSIS

Appearance	Heterogeneous light coloured powder
Chemical composition	Blend of proteolytic enzymes, activating salts and inert materials
Concentration	<i>approx 7500 l.v. units</i>

PROPERTIES

BIOTASE CONC is a concentrated enzymatic-bating agent, to be used on delimed hides or together with deliming products, to remove undesired protein substances.

BIOTASE CONC has been developed to approach a safe bating action also if the conditions of float are not properly prepared, this because its activity is able to work in a wide range of pH, *i.e.* from 6 to 9, without great variations of effect.

APPLICATION

The amount to be used and time of action may change according to the hide to be treated and the item to be produced.

Generally, we would suggest an amount from 0.05 to 0.15 % based on pelt weight.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
