

# BIOTASE LVP

Enzymatic bating agent for acid medium.

## TYPICAL ANALYSIS

Appearance	Heterogeneous powder, light colour
Chemical composition	Blend of enzymes, activating salts and inert materials
Concentration	<i>approx</i> 1200 i.v. units

## PROPERTIES

BIOTASE LVP is an enzymatic-bating agent for acid medium, especially formulated for goat and sheep skins, to remove undesired protein substances during depickling work in the range of pH from 4.5 to 6.0.

During this application a sensible distension of pickle folding – marks is usually obtained.

BIOTASE LVP has good “cleaning” properties for W.B. treatment.

## APPLICATION

The amount to be used and time of action may change according to the hide to be treated and the item to be produced.

Generally, we would suggest an amount from 0.5 to 4.0 % based on W.B. and from 0.5 to 2.0 % based on pickled.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

**Expiry date refers to the product well closed in the original container, in fresh and dry area.** Some particularly sensitive products, when open, should be used rapidly.

**Stir well before using the product, close tightly the container to preserve the properties.**
