

BIOTASE MBT

Enzymatic agent for liming.

TYPICAL ANALYSIS

Appearance	Off-white powder
Chemical composition	Blend of enzymes, activating salts and inert materials
Concentration	<i>approx</i> 2500 I.v. units

PROPERTIES

BIOTASE MBT works in a wide range of pH (7 to 13). It improves the bulb cleansing and the removing of natural pigmentation. It helps the opening of skin structure and the removing of non-structured proteins.

Moreover, it can be used in oxidative liming.

BIOTASE MBT enables using a reduced amount of sulphide. The liming process is more efficient and the appearance of the resulting skins is considerably smoother.

APPLICATION

The amount to be used and time of action may change according to the hide to be treated and the item to be produced.

Generally, we would suggest an amount of about 0.2 %.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
