

DECAL EK/P

DECAL EK/P is a typical delimiting agent for every type of hides, with very good buffering action.

TYPICAL ANALYSIS

Appearance	Off white powder
pH (10 % solution)	5.5±1.0.

PROPERTIES

DECAL EK/P is a classical delimiting agent which can be used on every type of hides: the strong buffering power of its salts makes the swelling of the grain virtually impossible.

DECAL EK/P delimites deeply and rapidly at relatively low percentages: this makes the delimiting operation really economic.

DECAL EK/P produces clean and relaxed pelt, with fine and elastic grain.

APPLICATION

DECAL EK/P is simply added as a powder to the drum: the amount used is between 2.0 and 4.0 %, depending on the type of hide.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
