

DERMALENE AL-SB

Mixture of inorganic salts.

TYPICAL ANALYSIS

Appearance	Off white powder
pH (10 % sol.)	3.0±1.0
Active substance	97 ± 3 %

PROPERTIES

DERMALENE AL-SB has been studied for getting on the retannage without making any other neutralisation; in fact we can obtain at the end of retannage a pH of 4.5/5.8.

The particular chemical nature of DERMALENE AL-SB enables to reduce time of retannage and to obtain leathers with a round feel and firm grain.

APPLICATION

The percentages vary from 3 to 5 % in combination with chrome tanning agents.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
