

DERMALENE L2T

DERMALENE L2T is a replacement syntan, based on condensation product of acid phenolsulfonic, dihydroxydiphenylsulfone, urea and formaldehyde.

TYPICAL ANALYSIS

Appearance	Off-white powder
Total solids	> 92 %
pH (10 % solution)	5.5±1.0

PROPERTIES

DERMALENE L2T is characterized by a high power tanning, with excellent lightfastness and strength to heat yellowing: so DERMALENE L2T is suitable in tanning of both chrome and vegetable tanned leathers; in the first case, it recommended to get leathers with a light background colour and good lightfastness, while in the second case DERMALENE L2T can be used in tanning in combination with vegetable extracts, facilitating the uniform distribution in leather.

Thanks to its low acidity, it is suitable for leathers for soft articles (ex. interior decoration and clothing) nailing wet.

APPLICATION

- in tanning of wet-blue for white: 2-5% (% refer to shaved weight);
- in tanning of leather furniture: 1-2% (% refer to shaved weight);
- in tanning of wet-blue crusts: 1-3% (% refer to shaved weight);
- in tanning of white leathers and reptiles: 10-15% (% refer to pelt weight).

When correctly stored, it is stable 36 months.
