

# DERMALENE NP

DERMALENE NP is a spray-dried naphthalene based product and is recommended as an auxiliary agent in the early stages of the vegetable tanning process and for final bleaching.

## TYPICAL ANALYSIS

Appearance	Clear brown powder
Solids	> 92 %
pH (10 % aqueous solution)	2.0 ± 1.0

## PROPERTIES

DERMALENE NP is a pale cream, free-flowing powder which is readily soluble in warm water. It has a pronounced bleaching action on vegetable tanned leathers leaving them with a uniform, clean, light colour. This product also inhibits the growth of mould.

## APPLICATION

Suggested amounts are of 2.0 % based on shaved weight.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

**Expiry date refers to the product well closed in the original container, in fresh and dry area.** Some particularly sensitive products, when open, should be used rapidly.

**Stir well before using the product, close tightly the container to preserve the properties.**
