

DERMALENE PR CONC

Mildly acidic syntan particularly studied as pre-tanning agent. It can also be used for mild retannage of chrome tanned leather.

TYPICAL ANALYSIS

Appearance	Light brown powder
Solid content	$\geq 92 \%$
pH (10 % solution)	3.0 ± 1.0

PROPERTIES

DERMALENE PR CONC is readily miscible with water. It penetrates pelts rapidly and uniformly and promote penetration of the subsequent vegetable tanning materials resulting in a clean, level coloured leather of smooth fine grain.

Due to it slight tanning action it is also used for the production of wet white preparation, imparting to the treated skins a particular wetting-back property.

DERMALENE PR CONC can be used prior to the vegetable tannage or mixed in any proportion with the vegetable extracts. In both cases it displays a strong dispersing action helping the distribution of the solutions of the extracts.

APPLICATION

The amounts normally applied range from 2.0 to 5.0 %.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
