

DERMALENE PRD

Retannage product.

TYPICAL ANALYSIS

Appearance	Pale yellow powder
Active content	> 92 %
pH	5.0-7.0

PROPERTIES

DERMALENE PRD is an organic - inorganic compound with protein base through which it is possible to obtain very full leather because of its high absorption by the leathers. Used for re-tannage it makes a very full leather and at the same time extremely soft with very fine grain. In all cases, its most important quality is the softness that the leather acquires after being treated.

APPLICATION

2-5 % fulfils most applications.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.
