

DERMALENE PRP LIQ.

Protein based retanning product.

TYPICAL ANALYSIS

Appearance	Brown coloured paste
pH	5.0-7.0
Active substance	50 ± 3 %

PROPERTIES

DERMALENE PRP LIQ. is a special protein based product through which it is possible to obtain very full leather because of its high absorption by the leathers.

Its particular filling and levelling action enables obtaining a very full leather and extremely soft as well.

Used before tanning or in combination with tanning agents or in re-tannage, its use ensures full, soft leathers.

APPLICATION

2-5 % fulfils most applications.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
