

# DERMALENE RH/N

DERMALENE RH/N is a powder tanning material, based on particularly formulated tanning agents.

## TYPICAL ANALYSIS

Appearance	White powder
Solids	> 92 %
pH (10 % solution)	4.5±1.0

## PROPERTIES

DERMALENE RH/N, when used alone, gives a very light-coloured, soft leather. However, in general, it is used in the retanning of chrome leather of all types.

DERMALENE RH/N produces grain leathers with a particularly fine, smooth grain and is thus recommended for the production of full grain lightfast aniline sides, calf, etc. It gives good fullness and softness in the tanning or retanning of woolskins and provides a bright white wool.

## APPLICATION

Generally an amount from 2.0 to 5.0 % fulfils all the requirements.

When correctly stored, it is stable 36 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

**Stir well before using the product, close tightly the container to preserve the properties.**
