

DERMAMINA LW

Weakly anionic fatliquor.

TYPICAL ANALYSIS

Appearance	white paste
Chemical composition	fatty acid derivative
Ionic character	weakly anionic
Active substance	47 ± 3 %
pH 10 % solution	7.0 ± 1.0
Lightfastness	very good
Dilutability in water	Emulsifiable
Stability to acids, alkalis, salts	Good

PROPERTIES

DERMAMINA LW is a fatliquor with very good lightfastness for a wide range of applications including white and pastel coloured leathers.

It has good dispersing properties on anionic dyes and pigment preparations as well as good levelling effect on dyeing.

DERMAMINA LW produces a full, round, relatively dry handle on the leather and good buffing properties.

This product is easily pumpable and electrolyte stable. It is compatible with non-ionic and anionic products (but has limited compatibility with vegetable and synthetic tannins) and with weakly cationic products.

APPLICATION

From 2 to 6 %, based on shaved weight, in combination with other fatliquors.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
