

PATO 26/N

PATO 26/N is a masked aldehyde.

TYPICAL ANALYSIS

Chemical composition	Masked aldehyde
Appearance	yellow to orange liquid
pH (analytical solution)	9.0÷11.0
Water solubility	Readily miscible with water
Stability	Stable throughout the pH scale

PROPERTIES

PATO 26/N has several important tanning and retanning properties, giving fuller, softer leather, with better lightfastness than other aldehyde derivatives.

It is particularly recommended for rechroming system: it will improve chrome uptake, giving fuller, softer leather, with fine, tight break.

Retanning with PATO 26/N before chrome enable reducing chrome offer and achieve an increase in the shrinkage temperature.

Thanks to its tight tanning action, it is normally used in all the articles where an improvement of the uptake of tanning agents is required, while keeping a smooth tight surface of the leather.

APPLICATION

In rechroming, from 0.5 % to 3 %

In neutralisation, from 0.5 % to 2 %

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
