

PATO 279

PATO 279 is a tanning agent based on modified aldehydes.

TYPICAL ANALYSIS

Appearance	Orange brown limpid liquid
pH (10 % aqueous solution)	4.5÷6.5
Active substance	35 ± 3 %
Water solubility	The product is dilutable with water

PROPERTIES

PATO behaves similarly to aldehydes, without the typical astringency. On pickled hides for chrome tanning it gives full and gummy leathers. It may also be used in retanning, anyway it is not recommended in the production of white or light coloured leathers, because of the yellowing typical of aldehyde products.

APPLICATION

From 2 to 3 % based on pelt weight in pickle float as a pretanning/tanning agent.

From 2 to 3 % based on shaved weight as a W.B. retanning agent .

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
