

PATO G285

PATO G285 is a tanning agent based on glutaraldehyde

TYPICAL ANALYSIS

Chemical composition	Glutaraldehyde, 22 ± 3 %
Appearance	Liquid colorless to light yellow, typical smell
pH (water solution, 10 %)	$3.0 \div 5.0$
Water solubility	Miscible

PROPERTIES

PATO G285 is universally suitable as retanning agent on *wet-blue* hides in combination with vegetable extracts and syntans. It binds irreversibly to the fibers giving a stable tanning effect on every kind of skins.

In retanning, it does not get heavy leather.

APPLICATION

1 to 10 % in pickling floats as tanning/pre-tanning agent.

1 to 4 % as retanning of w.b. leather.

When correctly stored, it is stable 12 months.

This sheet is a synthetic illustration of the product to enable the user to employ it at the best.

Properties and values are not, therefore, sales specifications.

Taking into account the several possibilities of application of this product, no warranty of the results is possible.

Expiry date refers to the product well closed in the original container, in fresh and dry area. Some particularly sensitive products, when open, should be used rapidly.

Stir well before using the product, close tightly the container to preserve the properties.
